

Seniors deserve the freedom to choose their doctor

The Medicare Patient Empowerment Act can make choice a reality

More and more doctors are being forced to limit the number of Medicare patients they accept. For seniors who paid into Medicare their whole lives, this goes against Medicare's promise—that seniors will have access to health care when they need it, and have the right to be cared for by any physician they choose.

If passed, the Medicare Patient Empowerment Act will give seniors the freedom to choose their doctor—whether that doctor accepts Medicare or not—and without having to change their Medicare plan.

How can you make a difference? Support the Medicare Patient Empowerment Act, here's how:

1

Sign our online petition at
www.MyMedicare-MyChoice.org.

2

Ask your representative to help America's seniors by cosponsoring H.R. 1700.

3

Ask your senators to cosponsor S. 1042.

Make sure seniors who have paid into Medicare get the care and choice that they want and deserve.
