Subject: RUC Recommendations

Dear Administrator Verma:

The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2019*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the October 5-7, 2017 RUC meeting.

CPT 2019 New and Revised Codes – *October 2017 RUC Submission*

The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 34 new/revised/related family CPT codes at the October 2017 meeting. The RUC submits work value and/or practice expense inputs for 34 new/revised/related family CPT codes from the October meeting.

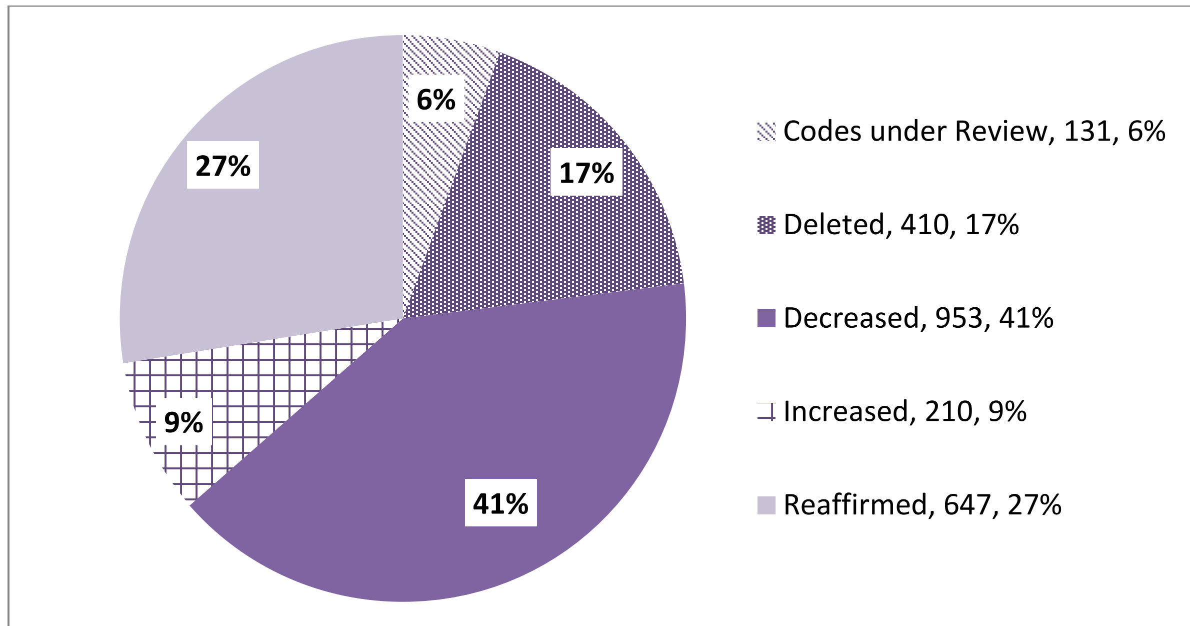
Existing Services Identified by RUC and CMS for Review

In addition to the new/revised CPT code submission, the RUC submits recommendations for 8 services identified by the RUC or CMS as potentially misvalued and reviewed at the October 2017 RUC meeting.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,351 potentially misvalued services through objective screening criteria and has completed review of 2,220 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter.*

Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project



Practice Expense Subcommittee

The attached materials include direct practice expense input (clinical staff time, supplies and equipment) recommendations for each code reviewed. In addition to recommendations related to the specific CPT codes under review, the RUC is submitting products of the Obtain Consent Workgroup and the Exam Light Workgroup. Based on the work of the Obtain Consent Workgroup the RUC recommends a standard time of 5 minutes, 7 minutes and 7 minutes for MR codes without, with and with and without contrast respectively, for the clinical activity, *provide education/obtain consent,* in the non-facility setting. The details of this recommendation are included in a Workgroup report along with the 51 MR services were this standard should be applied. The Exam Light Workgroup made recommendations directly to the PE Subcommittee, but has no recommendations to CMS for changes to the direct practice expense inputs in the Physician Payment Schedule at this time.

Accuracy of Practice Expense Data

Section 220 of the Protecting Access to Medicare Act of 2014 (PAMA), allocates funds for CMS "…to collect and use information on physicians' services in the determination of relative values." The types of information collected may include "Overhead and accounting information for practices of physicians and other suppliers." The RUC and HCPAC encourage CMS to use these funds to conduct an updated survey on practice expense data. In 2007 and 2008, the AMA conducted the Physician Practice Information survey, along with 72 medical specialty societies and other health care professional organizations. The PPIS is multispecialty, nationally representative, PE survey of both physicians and nonphysician practitioners (NPPs) paid under the PFS using a survey instrument. The survey collected physician practice expense data that was used by CMS to confirm the accuracy of practice expense data in the Medicare Physician Fee Schedule. It would be extremely beneficial for CMS to conduct a similar survey a decade later to confirm the accuracy of practice expense data, given the many changes that have

occurred since that time (e.g., the widespread adoption of certified electronic health record technology with its associated maintenance and staffing costs).

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed USB drive are:

- RUC Recommendation Status Report for New and Revised Codes

- RUC Recommendation Status Report for 2,351 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.

- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.

- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the October 2017 RUC meeting.

- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.

- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.

- BETOS Assignment Table: The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change.

- Source Code Utilization Crosswalk Table: A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2019 conversion factor increase.

- New Technology List and Flow Chart: In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 548 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

We appreciate your consideration of these RUC recommendations. If you have any questions regarding the attached materials, please contact Sherry Smith at (312) 464-5604.

Sincerely,

Peter K. Smith, MD

93571	Intravascular Doppler velocity and/or pressure derived coronary flow reserve measurement (coronary vessel or graft) during coronary angiography including pharmacologically induced stress; initial vessel (List separately in addition to code for primary procedure)	Coronary Flow Reserve Measurement	1.50		X	

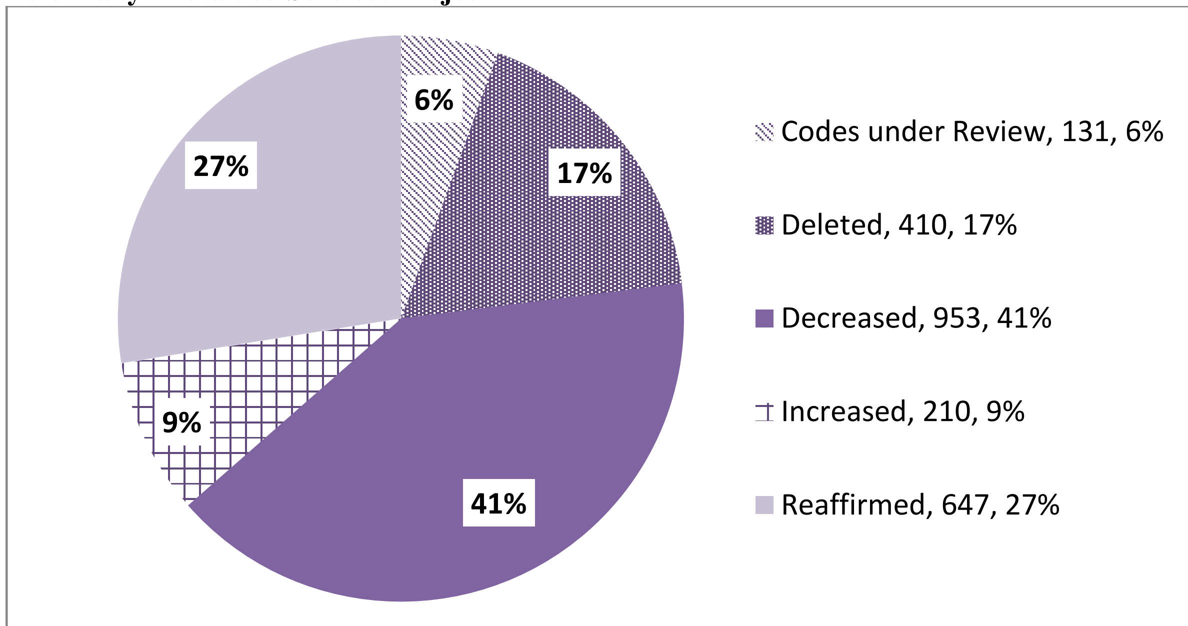
93572	Intravascular Doppler velocity and/or pressure derived coronary flow reserve measurement (coronary vessel or graft) during coronary angiography including pharmacologically induced stress; each additional vessel (List separately in addition to code for primary procedure)	Coronary Flow Reserve Measurement	1.00		X	

The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,351 services through 17 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the "new technology" list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining over 2,300 potentially misvalued services accounting for $45 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,363 services, redistributing $5 billion. Here are the outcomes for the committee's review of 2,351 codes:

Potentially Misvalued Services Project



Source: American Medical Association

New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 548 services. In September 2010, the re-review cycle began and since then the RUC has recommended 38 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 153 services every September after three years of Medicare claims data is available for each service.

Methodology Improvements
The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

Site of Service Anomalies
The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 14 codes. The RUC completed review of services under this initial screen.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These services were referred to CPT and recommendations were submitted to CMS for the 2018 Medicare Physician Payment Schedule.

In 2016, the RUC identified one site of service anomaly CPT code and submitted the recommendation to CMS for the 2019 Medicare Physician Payment Schedule. In 2017, the RUC identified one site of service anomaly CPT code and has referred this code to the CPT Editorial Panel for revision.

High Volume Growth
The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 15 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 44 recommendations to CMS for services for the 2012-2017 Medicare Physician Payment Schedules. In September 2011, the RUC began review of services after two years of utilization data were collected. The RUC will continue to review the remaining four services after additional utilization data is available.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 57 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC recommended review of five services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted eight codes and the RUC submitted recommendations for 41 services for the 2015-2018 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 27 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC will review five services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted eight codes and the RUC submitted recommendations for 13 services for the 2017-2019 Medicare Physician Payment Schedules.

In October 2016, the RUC ran this screen again and the query resulted in the identification of 12 services, which was expanded to 14 services. The RUC will review two services after additional utilization data is available and provide recommendations for the remaining 12 services for the 2019 Medicare Physician Payment Schedule.

CMS Fastest Growing
In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 27 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 43 codes. The RUC submitted 37 recommendations to CMS for the 2012-2019 Medicare Physician Payment Schedules. The RUC will review the remaining four services after additional utilization data is available.

High IWPUT
The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWPUT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWPUT was considered appropriate. The RUC completed review of services under this screen.

Services Surveyed by One Specialty – Now Performed by a Different Specialty
In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

Harvard Valued
Utilization over 1 Million
CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 30,000
In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Medicare Allowed Charges >$10 million
In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > $10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately $1 million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS/Other
Utilization over 500,000
In April 2011, the RUC identified 410 codes with a source of "CMS/Other." CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. "CMS/Other" source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service after additional utilization data is available.

Utilization over 250,000
In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC removed nine services and submitted 32 recommendations to CMS for the 2015-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
In October 2016, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 100,000 or more, which resulted in 27 services and was expanded to 41 services to include the family of services. The RUC referred two codes to CPT for deletion and submitted recommendations for 39 services for the 2019 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Bundled CPT® Services
Reported 95% or More Together
The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

Reported 75% or More Together
In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar "groups" to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at

the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 126 new and/or revised codes that described the bundles of services. The RUC will review two services after additional utilization data is available.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 167 total codes under review, the CPT® Editorial Panel deleted 52 services. The RUC has submitted 113 code recommendations for the 2014-2019 Medicare Physician Payment Schedules and will review two services after additional utilization data is available.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions. Of the 75 total codes under review, the CPT Editorial Panel deleted 26 services. The RUC submitted 47 code recommendations for the 2017-2019 Medicare Physician Payment Schedules and will review the two services after additional utilization data is available.

In October 2017 the Relativity Assessment Workgroup performed the fifth cycle analysis of code pairs reported together with 75% or greater frequency. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria four groups or 8 codes were identified. The Relativity Assessment Workgroup will review these codes to determine if code bundling solutions are appropriate.

Low Value/Billed in Multiple Units
CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Low Value/High Volume Codes
CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Multi-Specialty Points of Comparison List
CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100 of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS High Expenditure Procedural Codes
In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes. The RUC submitted 123 recommendations to CMS for the 2013-2019 Medicare Physician Payment Schedules will review utilization data for two services after additional data is available.

In the Final Rule for 2016, CMS requested that the RUC review a list of 103 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of $10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010.

The RUC expanded the list of services to 238 services to include additional codes as part of the family. The CPT Editorial Panel deleted 29 codes. The RUC submitted 206 recommendations to CMS for the 2017-2019 Medicare Physician Payment Schedules and will review the remaining three services after additional utilization data is available.

Services with Stand-Alone PE Procedure Time
In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of $100,000 or more, include direct equipment inputs that amount to $100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Pre-Time Analysis
In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments.

The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Post-Operative Visits

010-Day Global Codes

In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

090-Day Global Codes

In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

High Level E/M in Global Period

In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to 11 services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The CPT Editorial Panel deleted one code. The RUC submitted recommendations for 10 services for the 2017-2018 Medicare Physician Payment Schedules. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward. The RUC has completed review of the services under this screen.

000-Day Global Services Reported with an E/M with Modifier 25

In the NPRM for 2017 CMS identified 83 services with a 000-day global period billed with an E/M 50 percent of the time or more, on the same day of service, same patient, by the same physician, that have not been reviewed in the last five years with Medicare utilization greater than 20,000.

The RUC commented that it appreciated CMS' identification of an objective screen and reasonable query. However, based on further analysis of the codes identified, it appears only 19 services met the criteria for this screen and have not been reviewed to specifically address an E/M performed on the same date. There were 38 codes that did not meet the screen criteria; they were either reviewed in the last 5 years and/or are not typically reported with an E/M. For 26 codes, the summary of recommendation (SOR), RUC rationale or practice expense inputs submitted specifically states that an E/M is typically reported with these services and the RUC accounted for this in its valuation.

The RUC requested that CMS remove 64 services that did not meet the screen criteria or which have already been valued as typically being reported with an E/M service. The RUC requested that CMS condense and finalize the list of services for this screen to the 19 remaining services.

In the Final Rule for 2017, CMS did finalize the list of 000-day global services reported with an E/M to the 19 services that truly met the criteria. The RUC recommended that two additional codes be removed from this screen as the specialty societies discovered that in fact an E/M as typical was considered in the survey process. Additional codes were added as part of the family of codes identified, totaling 22. The CPT Editorial Panel deleted one code and the RUC submitted 21 recommendations for the 2019 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

Public Comment Requests
In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

Final Rule for 2013
In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 46 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thoracoscopic procedures. The RUC submitted recommendations for 32 services for the 2014-2018 Medicare Physician Payment Schedules. The RUC will review six services after additional utilization data is available.

Final Rule for 2014
CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 91 services. The CPT® Editorial Panel deleted 11 services. The RUC submitted recommendations to CMS for 79 services for the 2015-2018 Medicare Physician Payment Schedules and will review one service after additional data is available.

Final Rule for 2015
In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 52 services to include additional codes as part of this family. The CPT Editorial Panel deleted 15 services. The RUC submitted 36 recommendations for the 2016-2019 Medicare Physician Payment Schedules and will review one service after additional utilization data is available.

Final Rule for 2016
In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 41 services to include an additional code as part of the family. The CPT Editorial Panel deleted 3 services. The RUC submitted 32 recommendations for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining six services for the 2019 Medicare Physician Payment Schedule.

Other Issues
In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT® Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

CMS Requests and RUC Relativity Assessment Workgroup Code Status	
Total Number of Codes Identified*	**2,351**
Codes Completed	**2,220**
Work and PE Maintained	647
Work Increased	210
Work Decreased	795
Direct Practice Expense Revised (beyond work changes)	158

20926 Tissue grafts, other (eg, paratenon, fat, dermis)

Screen	RUC Meeting	Specialty Society:	CPT Meeting
CMS Fastest Growing / Site of Service Anomaly	October 2017	AAOS, ASPS, AANS, CNS	May 2018 / October 2009

Background: At the April 2009 RUC meeting the RUC recommended that this service be surveyed and reviewed in October 2009. At the October 2009 RUC meeting the specialty society indicated that 20926 is most frequently billed with 27447 Arthroplasty, knee… and 27130 Arthroplasty, acetabular…The specialty indicated that 20926 is not intended to be used with total knee and total hip arthroplasty codes unless an autologous tissue graft from a separate incisional site is necessary. Contrary to guidance published in CPT Assistant and AAOS coding articles, 20926 is being reported when utilizing an allographic substance for hemostasis. Therefore the specialty requested and the RUC agreed that code 20926 be referred to the CPT Editorial Panel for revision of the descriptor to assure that 20926 is reported correctly. At the October 2009 CPT meeting, the specialty requested that the Panel add a crossreference under 20926 to indicate that this Category III code (injection of platelet rich plasma) may be reported instead. **Specialties will have to present this issue to the Five-Year Review Identification Workgroup to ensure that this revision adequately addresses identified concerns**. In October 2017, AMA Staff reviewed services with anomalous sites of service when compared to Medicare utilization data. One service was identified, CPT code 20926, in which the Medicare data from 2013-2016e indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. The specialty societies submitted an action plan and indicated that they believe the site of service issue is due to miscoding. The CPT manual includes a parenthetical that was added in 2011 that states (For injection(s) of platelet rich plasma, use 0232T) which resulted in some decrease in utilization for a few years, but now the utilization is creeping up again. The specialty societies believe the typical patient related to this code would be treated in a facility setting and that the site of service anomaly, for both the outpatient and the office setting is the result of miscoding. The specialty societies propose to address this miscoding by developing a CPT assistant article and possible introductory language to emphasize correct coding. The Workgroup recommends that CPT code 20926 be referred to the CPT Editorial Panel for the May 2018 CPT Editorial meeting to add/revise the introductory language and referred to CPT Assistant for education on when to report this service.

27X69

Screen	RUC Meeting	Specialty Society:	CPT Meeting
Harvard Valued - Utilization Over 30,000-Part2 / High Volume Growth3 / CMS High Expenditure Procedural Codes2	October 2017	ACR	February 2018

Background: In June 2017, the CPT Editorial deleted of injection of contrast for knee arthrography code 27370 with new code to report injection procedure for knee arthrography or enhanced CT/MRI knee arthrography. At the October 2017 RUC meeting, code 27X69 Injection procedure for contrast knee arthrography or contrast enhanced CT/MRI knee arthrography was discussed. In an effort to support accurate reporting for codes 20610, 20611, it was suggested that the parenthetical note currently placed under new code 27X69 also be placed after the deletion note for code 27370.
(For arthrocentesis of the knee or injection of any material other than contrast for subsequent arthrography, see 20610, 20611).

33015 Tube pericardiostomy

Screen	RUC Meeting	Specialty Society:	CPT Meeting
Negative IWPUT	October 2017	ACC	February 2018

Background: A RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017 the RUC recommended that this service be referred to CPT for deletion. If additional specialty soiceites do not agree to submit a coding change application for deletion then this service should be surveyed.

Code	Descriptor	Screen	RUC Meeting	Specialty Society:	CPT Meeting
78492	**Myocardial imaging, positron emission tomography (PET), perfusion; multiple studies at rest and/or stress**	High Volume Growth4	January 2017	ACC, ACR, ACNM, SNMMI	February 2018

Background: This service was identifed by the High Volume Growth screen, with total Medicare utilization of 10,000 or more that have increased by at least 100% from 2009 through 2014. The Relativity Assessment Workgroup requested action plans for these services for the January 2017 meeting. In January 2017, the RUC recommended to refer this codde to CPT Editorial Panel to undergo substantive descriptor changes to reflect newer technology aspects such as wall motion, ejection fraction, flow reserve, and technology updates for hardware and software.

Code	Descriptor	Screen	RUC Meeting	Specialty Society:	CPT Meeting
92225	**Ophthalmoscopy, extended, with retinal drawing (eg, for retinal detachment, melanoma), with interpretation and report; initial**	Negative IWPUT	October 2017	AAO	February 2018

Background: A RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017, the specialty society indicated that there needs to be modification of the descriptor of 92225 and 92226 to better specify what portion of the eye is being subjected to an examination well beyond the normal comprehensive eye exam. The typical uses are for evaluation of retinal disease and for examination of the optic nerve and the work between the two portions of the eye would be different. With glaucoma now being 10 percent of the volume for this service, there should be two codes to differentiate the two anatomic sites. Maintenance of the current terminology of initial and subsequent, however, does not seem suitable or necessary. Even now the current RUC valuations are minimally different and thus not really needed and the specialty society propose to delete CPT 92226. The RUC refers this issue to the CPT Editorial Panel.

Code	Descriptor	Screen	RUC Meeting	Specialty Society:	CPT Meeting
92548	**Computerized dynamic posturography**	CMS-Other - Utilization over 250,000 / Negative IWPUT / Different Performing Specialty from Survey	October 2017	AAA, AAN, ASHA	September 2018 / February 2014

Background: In 2014 the RUC referred this code to the CPT Editorial Panel for development of coding change proposals to condense pairs into a single code and create new coding structures. Type A code - code pair is reported together greater than 95% in a bi-directional relationship. This change was editorial. In 2017, a RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017, the specialties indicated that CPT code 92548 has not been reviewed since 1997. The code descriptor for this code is vague and current utilization may not be reflective of intended use. Practice expense includes specialized computerized equipment and audiologists are included in clinical work. Neurology and audiology agree that the code descriptor and practice expense must be updated. The specialties also believe that utilization may vary for this code with providers performing this service in different ways using different (or no) equipment. Neurology and audiology plan to review current utilization among their respective provider groups to better inform the code revision/development process. The RUC refers code 92548 to the CPT Editorial Panel for revision.

Code	Descriptor	Screen	RUC Meeting	Specialty Society:	CPT Meeting
92626	**Evaluation of auditory rehabilitation status; first hour**	CMS Request - Audiology Services / High Volume Growth2	October 2017	AAA, ASHA	May 2018

Background: In October 2016, this service was identified through the High Volume Growth screen the RUC recommended that this service be reffered to CPT Assistant to address specifically how to be used for the typical Medicare recipient. The RAW reviewed again after 3 years of data were available. In October 2017, the RUC recommended that this service be referred to the CPT May 2018 meeting. The audiology specialty societies would like to further review utilization and revise the code descriptor/create additional codes to clarify the clinical work associated with the provision of this service.

Code	Descriptor	Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
20926	**Tissue grafts, other (eg, paratenon, fat, dermis)**	CMS Fastest Growing / Site of Service Anomaly	October 2017	Refer to CPT and CPT Assistant	AAOS, ASPS, AANS, CNS	

Background: At the October 2009 CPT meeting, the specialty requested that the Panel add a crossreference under 20926 to indicate that this Category III code (injection of platelet rich plasma) may be reported instead. Feb 2010, the Workgroup recommended to review claims data after 2 years at the October 2012 RUC meeting. In October 2012, the Workgroup recommended to remove this code from re-review, as the category III code was created to report injection of platelet rich plasma and volume is dropping. In October 2017, AMA Staff reviewed services with anomalous sites of service when compared to Medicare utilization data. One service was identified, CPT code 20926, in which the Medicare data from 2013-2016e indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. The specialty societies submitted an action plan and indicated that they believe the site of service issue is due to miscoding. The CPT manual includes a parenthetical that was added in 2011 that states (For injection(s) of platelet rich plasma, use 0232T) which resulted in some decrease in utilization for a few years, but now the utilization is creeping up again. The specialty societies believe the typical patient related to this code would be treated in a facility setting and that the site of service anomaly, for both the outpatient and the office setting is the result of miscoding. The specialty societies propose to address this miscoding by developing a CPT assistant article and possible introductory language to emphasize correct coding. The Workgroup recommends that CPT code 20926 be referred to the CPT Editorial Panel for the May 2018 CPT Editorial meeting to add/revise the introductory language and referred to CPT Assistant for education on when to report this service.

Code	Descriptor	Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
21820	**Closed treatment of sternum fracture**	CMS Request - Final Rule for 2014 / Emergent Procedures	April 2016	PE Clinical staff pre-time revised	AAOS, ACEP, and orthopaedic subspecialties	Dec 2017

Background: Added as part of 21800 family for Final Rule issue. In October 2015, the Emergent Procedures Workgroup identified 34 services that have 60 minutes pf pre-service clinical staff time in the facility-only setting. The Emergent Procedures Workgroup referred these issues to the RAW to review as potentially misvalued. Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominiant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of “requiring anesthesia” and “with anesthesia” as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominiant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of “requiring anesthesia” and “with anesthesia” as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominiant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of “requiring anesthesia” and “with anesthesia” as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

36511	**Therapeutic apheresis; for white blood cells**	CMS Request - Final Rule for 2016	January 2017	2.00. Refer to CPT Assistant.	CAP, RPA	

Background: In September 2016, the CPT Editorial Panel deleted 36515 and revised 36516 to included immunoabsorption. CPT codes 36511-36514 and 36522 were added as part of this family of services. In January 2017, the PE Subcommittee discussed the direct practice expense inputs proposed by the specialty societies and determined that there was duplication between the clinical staff tasks of the pre-service period and the pre-service portion of the service period. The Subcommittee reduced the pre-service time from 18 to 8 minutes. The Subcommittee discussed the significant time needed for the staff to Assist physician in performing procedure in the service period and agreed with the specialties that this service is one-on-one with the patient and the RN/LPN (L042A) is not able to multitask during this time. The Subcommittee discussed the significant time needed to prepare the room, equipment, and supplies. The specialties explained that the clinical staff time hadn't been accurately accounted for when it was last reviewed in 2004. The PE Subcommittee also discussed that much of the time requested in the post-service time was duplicative of the monitoring time and removed most of that time while maintaining the specialty recommended 10 minutes for monitoring in the service period. Additionally the PE Subcommittee reduced the time for Clean room/equipment by physician staff; remove disposables from machine from 7 in 36514 and 36516 and 5 in 36522 to the standard 3. The Subcommittee discussed the possibility that some of the supply items are separately reportable. The Subcommittee found that albumin saline (SH004) which is 5% albumin is separately reportable and new supply item calcium gluconate is separately reportable with J code J0610 per 10 ml for the drug along with CPT code 96365 to mix the bag. The Subcommittee deleted the two supply items and recommends that the specialty societies prepare a CPT assistant article regarding how to report separately for these supplies. The RUC reviewed and approved the direct practice expense inputs with modifications as approved by the Practice Expense Subcommittee. The specialty societies plan to submit an article by December 2017.

36513	**Therapeutic apheresis; for platelets**	CMS Request - Final Rule for 2016	January 2017	2.00. Refer to CPT Assistant.	CAP, RPA	

Background: In September 2016, the CPT Editorial Panel deleted 36515 and revised 36516 to included immunoabsorption. CPT codes 36511-36514 and 36522 were added as part of this family of services. In January 2017, the PE Subcommittee discussed the direct practice expense inputs proposed by the specialty societies and determined that there was duplication between the clinical staff tasks of the pre-service period and the pre-service portion of the service period. The Subcommittee reduced the pre-service time from 18 to 8 minutes. The Subcommittee discussed the significant time needed for the staff to Assist physician in performing procedure in the service period and agreed with the specialties that this service is one-on-one with the patient and the RN/LPN (L042A) is not able to multitask during this time. The Subcommittee discussed the significant time needed to prepare the room, equipment, and supplies. The specialties explained that the clinical staff time hadn't been accurately accounted for when it was last reviewed in 2004. The PE Subcommittee also discussed that much of the time requested in the post-service time was duplicative of the monitoring time and removed most of that time while maintaining the specialty recommended 10 minutes for monitoring in the service period. Additionally the PE Subcommittee reduced the time for Clean room/equipment by physician staff; remove disposables from machine from 7 in 36514 and 36516 and 5 in 36522 to the standard 3. The Subcommittee discussed the possibility that some of the supply items are separately reportable. The Subcommittee found that albumin saline (SH004) which is 5% albumin is separately reportable and new supply item calcium gluconate is separately reportable with J code J0610 per 10 ml for the drug along with CPT code 96365 to mix the bag. The Subcommittee deleted the two supply items and recommends that the specialty societies prepare a CPT assistant article regarding how to report separately for these supplies. The RUC reviewed and approved the direct practice expense inputs with modifications as approved by the Practice Expense Subcommittee. The specialty societies plan to submit an article by December 2017.

95249	**Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; patient-provided equipment, sensor placement, hook-up, calibration of monitor, patient training, and printout of recording**	High Volume Growth2	April 2017	PE Only. Referral to CPT Assistant	AACE, ES, ACP	

Background: In February 2017 the CPT Editorial Panel revised 95250 & 95251 and created a new code to diferentiate between physician owned and patient owned equipment. In April 2017, The RUC recommends referral to the CPT Editorial Panel to add introductory language indicating that when data are collected outside the provider office, as when the patient uses a phone app, code 9525X cannot be billed. The RUC recommends referral to the CPT Editorial Panel to add introductory language indicating that 9525X is to be billed only once during the entire period that the patient owns the data receiver. The code cannot be billed for any subsequent use of the CGM device by the patient or physician. Code 9525X cannot be billed when the patient receives a new sensor or transmitter. Additionally, the RUC recommends that the specialty work with the AMA to develop a CPT Assistant article to clarify appropriate use of the new CPT code 9525X, specifically that the code should only be reported when instructing the patient on use of a new data receiver and cannot be reported when data is collected outside of the provider office. In June 2017, the CPT Editorial Panel 1) Revised the parenthetical note following code 9525X to instruct that 9525X should not be reported more than once for the duration that the patient owns the data receiver; 2) Added guidelines that state when data are collected outside the provider office, as when the patient uses a phone app, code 9525X may not be reported; and 3) Indicated that instruction be provided immediately when the equipment is owned by the patient and that a list of codes be reported until the code is reported.

958X3		High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	0.95 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017, the RUC noted code 95X83 is defined as simple programming of cranial nerve neurostimulator (adjustment of 1-3 parameters) versus deleted code 95974 which was time based and defined as the first hour of programming and 95X84 is defined as complex programming of cranial nerve neurostimulator (adjustment of more than 3 parameters) versus deleted code 95975, which was a time-based add-on code defined as each additional 30 minutes of programming. The RUC recommends that the specialty societies develop a CPT Assistant article to direct providers on when to report simple versus complex cranial nerve neurostimulator services.

958X4

High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	1.19 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017, the RUC noted code 95X83 is defined as simple programming of cranial nerve neurostimulator (adjustment of 1-3 parameters) versus deleted code 95974 which was time based and defined as the first hour of programming and 95X84 is defined as complex programming of cranial nerve neurostimulator (adjustment of more than 3 parameters) versus deleted code 95975, which was a time-based add-on code defined as each additional 30 minutes of programming. The RUC recommends that the specialty societies develop a CPT Assistant article to direct providers on when to report simple versus complex cranial nerve neurostimulator services.

958X5

Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	1.25 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017 the RUC noted 95X85 is defined as the first 15 minutes of programming for brain neurostimulator versus deleted code 95978, which was defined as the first hour of programming and 95X86 is defined an add-on service for each additional 15 minutes of brain neurostimulator programming versus the deleted code 95979 which was defined as each additional 30 minutes. The specialty societies indicated that programming for brain neurostimulators is always complex therefore it is unnecessary for a simple versus complex coding structure. The RUC noted the CPT coding conventions when reporting timed codes and recommends that the specialty societies develop a CPT Assistant article to direct providers on how to correctly report the brain neurostimulator services.

958X6

994X7	**Chronic care management services, provided personally by a physician or other qualified health care professional, at least 30 minutes of physician or other qualified health care professional time, per calendar month, with the following required elements: multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient, chronic conditions place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline; comprehensive care plan established, implemented, revised, or monitored**	New service, not part of RAW	April 2017	1.45. Refer to CPT Assistant	AAFP, AAN, ACP, AGS	

Background: In April 2017, when the RUC discussed the practice expenses associated with this service, CMS questioned why the clinical labor staff time is half that of the physician time. The specialty societies indicated that since this code would be reported instead of office visits, the clinical staff services would include patient maintenance activities such as answering questions, refilling prescriptions and calling home care agencies. CMS was concerned that the description of clinical labor staff work may overlap with the physician work. The specialty societies indicated that there will be some overlap, but the total cumulative time of the physician versus the clinical staff would be the distinction to determine whether to report this service or clinical staff service 99490. The PE Subcommittee was concerned that it would be difficult to track when the work of the physician becomes greater than the work of the clinical staff in order to determine which code to report and noted that correct reporting of this service will require both the physician and the clinical staff to carefully track their work time. The RUC recommends that the specialty work with the AMA to develop a CPT Assistant article to clarify the proper reporting of code 994X7 versus 99490.

New Technology/New Services List

81225	CYP2C19 (cytochrome P450, family 2, subfamily C, polypeptide 19) (eg, drug metabolism), gene analysis, common variants (eg, *2, *3, *4, *8, *17)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012	October 2015	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81227	CYP2C9 (cytochrome P450, family 2, subfamily C, polypeptide 9) (eg, drug metabolism), gene analysis, common variants (eg, *2, *3, *5, *6)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012	October 2015	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑

CPT Code	2018 Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete
81235	EGFR (epidermal growth factor receptor) (eg, non-small cell lung cancer) gene analysis, common variants (eg, exon 19 LREA deletion, L858R, T790M, G719A, G719S, L861Q)	Sep 2011	Molecular Pathology Test - Tier 1	09	CPT 2013	October 2016	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81240	F2 (prothrombin, coagulation factor II) (eg, hereditary hypercoagulability) gene analysis, 20210G>A variant	Apr 2011	Molecular Pathology Test - Tier 1	15	CPT 2012	October 2015	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81241	F5 (coagulation factor V) (eg, hereditary hypercoagulability) gene analysis, Leiden variant	Apr 2011	Molecular Pathology Test - Tier 1	15	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81243	FMR1 (fragile X mental retardation 1) (eg, fragile X mental retardation) gene analysis; evaluation to detect abnormal (eg, expanded) alleles	Apr 2011	Molecular Pathology - Tier 1	15	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81244	FMR1 (Fragile X mental retardation 1) (eg, fragile X mental retardation) gene analysis; characterization of alleles (eg, expanded size and methylation status)	Apr 2011	Molecular Pathology - Tier 1	15	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81245	FLT3 (fms-related tyrosine kinase 3) (eg, acute myeloid leukemia), gene analysis; internal tandem duplication (ITD) variants (ie, exons 14, 15)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑

CPT Code	2018 Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete
81252	GJB2 (gap junction protein, beta 2, 26kDa, connexin 26) (eg, nonsyndromic hearing loss) gene analysis; full gene sequence	Sep 2011	Molecular Pathology Test - Tier 1	09	CPT 2013	October 2016	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81253	GJB2 (gap junction protein, beta 2, 26kDa, connexin 26) (eg, nonsyndromic hearing loss) gene analysis; known familial variants	Sep 2011	Molecular Pathology Test - Tier 1	09	CPT 2013	October 2016	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81254	GJB6 (gap junction protein, beta 6, 30kDa, connexin 30) (eg, nonsyndromic hearing loss) gene analysis, common variants (eg, 309kb [del(GJB6-D13S1830)] and 232kb [del(GJB6-D13S1854)])	Sep 2011	Molecular Pathology Test - Tier 1	09	CPT 2013	October 2016	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81256	HFE (hemochromatosis) (eg, hereditary hemochromatosis) gene analysis, common variants (eg, C282Y, H63D)	Apr 2011	Molecular Pathology - Tier 1	15	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81257	HBA1/HBA2 (alpha globin 1 and alpha globin 2) (eg, alpha thalassemia, Hb Bart hydrops fetalis syndrome, HbH disease), gene analysis, for common deletions or variant (eg, Southeast Asian, Thai, Filipino, Mediterranean, alpha3.7, alpha4.2, alpha20.5, and Constant Spring)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81261	IGH@ (Immunoglobulin heavy chain locus) (eg, leukemias and lymphomas, B-cell), gene rearrangement analysis to detect abnormal clonal population(s); amplified methodology (eg, polymerase chain reaction)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑

CPT Code	2018 Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete
81262	IGH@ (Immunoglobulin heavy chain locus) (eg, leukemias and lymphomas, B-cell), gene rearrangement analysis to detect abnormal clonal population(s); direct probe methodology (eg, Southern blot)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81263	IGH@ (Immunoglobulin heavy chain locus) (eg, leukemia and lymphoma, B-cell), variable region somatic mutation analysis	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81264	IGK@ (Immunoglobulin kappa light chain locus) (eg, leukemia and lymphoma, B-cell), gene rearrangement analysis, evaluation to detect abnormal clonal population(s)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81265	Comparative analysis using Short Tandem Repeat (STR) markers; patient and comparative specimen (eg, pre-transplant recipient and donor germline testing, post-transplant non-hematopoietic recipient germline [eg, buccal swab or other germline tissue sample] and donor testing, twin zygosity testing, or maternal cell contamination of fetal cells)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81266	Comparative analysis using Short Tandem Repeat (STR) markers; each additional specimen (eg, additional cord blood donor, additional fetal samples from different cultures, or additional zygosity in multiple birth pregnancies) (List separately in addition to code for primary procedure)	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012	October 2015	Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑

CPT Code	2018 Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete
81267	Chimerism (engraftment) analysis, post transplantation specimen (eg, hematopoietic stem cell), includes comparison to previously performed baseline analyses; without cell selection	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81268	Chimerism (engraftment) analysis, post transplantation specimen (eg, hematopoietic stem cell), includes comparison to previously performed baseline analyses; with cell selection (eg, CD3, CD33), each cell type	Sep 2011	Molecular Pathology Test - Tier 1	05	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
81270	JAK2 (Janus kinase 2) (eg, myeloproliferative disorder) gene analysis, p.Val617Phe (V617F) variant	Apr 2011	Molecular Pathology - Tier 1	15	CPT 2012		Removed. Final Rule for 2013 stated molecular pathology services will be paid for under CLFS not MFS.	☑
