

Errata and Technical Corrections – CPT® 2025

Date: December 2, 2024

The information that follows is sourced to either a publication errata or a technical correction by the CPT Editorial Panel. An errata (denoted as **E**) for the current edition of the CPT code set will publish information that was approved by the CPT Editorial Panel and inadvertently excluded from the current code set. Technical corrections (denoted as **T**) are clarifications of original Panel intent for the current code structure. All items below are errata if they are not designated as a technical correction in the right-hand column. The order of the entries on this document is by code order. Additionally, each entry shows the date of publication to this document. The links immediately following are provided as a guide to the most recently added items. **The effective date for each item is January 1, 2025.** Updates to this document are made as issues surface requiring clarification.

Most recent entries added to *Errata and Technical Corrections - CPT® 2025*

- Add parenthetical note following code 77002 to the Radiology Fluoroscopic Guidance subsection.
- Remove the resequenced (#) symbol to note that code 90480 is not out of numerical sequence in the Medicine Immunization Administration for Vaccines/Toxoids subsection.
- Update codes 0766T and 0767T by replacing the term “marking” with “mapping” in the Category III section which were originally revised in the CPT 2024 errata on November 11, 2024, but was not completed in time for the production of the 2025 code set.
