

Organized Medical Staff Section (AMA-OMSS)

Delegate

Name

Nancy Fan

Credentials

MD

Pronouns

She/Her

Statement of interest

When I first joined the OMSS almost 10 years ago, I was attracted by the amount of advocacy work within the OMSS. In my past two terms as the alternate delegate, I have greatly enjoyed, not just developing AMA policy, but also the collegial relationship I have with Dr. Gold, the outgoing Delegate and the entire Governing Council. It has been deeply satisfying to advocate for OMSS interest within the House of Delegates and to craft impactful AMA policy. I believe my experience as the alternate delegate and from multiple other leadership positions, as noted in my CV, have provided me with the unique skills needed for the position of OMSS Delegate, as an effective voice for the OMSS within the House of Delegates and a valuable member of the Governing Council. I relish being able to advance the principles within the OMSS mission statement both within the Section and throughout the AMA, as the OMSS Delegate.

Diversity statement

I have always believed that physicians should reflect the diversity in their patients. It is invaluable in building good patient-physician relationships. I also believe that organizations are more

effective and impactful when their leadership reflects their membership. As a female Asian, I have strived to be a "value add" to any leadership position I have held, whether in my hospital, in my state medical society or in my community work. I have attempted to not limit this to the perspective of "just" being a female or Asian but rather, promote any initiatives which address issues of diversity and inclusivity. These concepts will continue to be essential areas of focus in any leadership position I have and will serve.
