

Alan K. Klitzke, MD, FACNM, FACR

Friends and Colleagues,

I am honored to nominate Dr. Alan Klitzke for position on OMSS Governing Council as Director At-Large.

Dr. Klitzke brings passionate commitment and unparalleled experience to the table. He has been actively engaged in organized medicine his entire physician life, serving in multiple leadership positions including:

He is currently the Society of Nuclear Medicine & Molecular Imaging (SNMMI) Correlative Imaging Council (June 2024- June 2026), Past President of the American College of Nuclear Medicine and currently on their Board of Directors as well as AMA Delegate representing American College of Nuclear Medicine.

He has a deep understanding of the AMA policy and the policy making process as he has served our AMA House of Delegates as a reference committee chairman. With an upsurge of anti-science rhetoric that bled over into our political sphere and the outright disrespect for physicians and scientists, he has been passionate about defending our profession and is poised to continue those efforts. He has and will continue to work vigorously for our patients and profession.

His perspective and extensive experience as an employed practicing nuclear radiologist and leader in multiple organizations including AMA delegate places him in a very strong position to serve us well.

I'm honored to nominate and support Dr Alan Klitzke for our OMSS Governing Council Director-At-Large.

Enthusiastically submitted,
Woody Jenkins, MD
